AdEPT Telecom Large Business* Terms and Conditions

“The BIG PRINT”

(we hate small print)

Every contract has to have a set of Terms and Conditions. However, we hate the idea of hiding away all the nasty bits in as small a print size as you think you can get away with. That's why we've called this THE BIG PRINT.

This document clearly sets out, in as simple English as we can ...

- What YOU can expect from us, and
- What WE can expect from you

A summary of your Terms and Conditions is on the next page

***A Large Business is defined as any business who spends more than £3000 per annum.**

5 How long is your contract?

5.1 Contract length

The Minimum Period for any data connectivity or data network product commences on the date of activation of the circuit(s).

Business contracts for all products were either 1, 2, 3 or 5 years.

A renewable contract applied to all contracts signed after 18th November 2008. 5.2 Minimum contract period

If there is a conflict between these general terms, the special terms or applicable product terms, our tariff, any order acknowledgement or any other reference to a Minimum Contract Period then the longest period specified shall constitute the Minimum Contract Period. Following the Minimum Contract Period, the Service will continue until terminated in accordance with these Terms. If the Service is modified such that the Service or pricing depends on your commitment to a further contract period, then this further commitment shall be deemed to extend the Minimum Contract Period until the end of this further contract period.

5.3 Reasons for serving notice to end the contract

Either you or we may end a Service or the contract by thirty (30) days prior notice (written or verbal) to the other if:

- the other party has materially breached these Terms and has not corrected such breach within thirty (30) days of a written notice requiring correction; or
- the other party is, or is deemed to be insolvent, bankrupt or unable to pay its debts, makes or proposes an arrangement or composition with its creditors generally, enters into liquidation whether compulsorily or voluntarily or makes an application to a court of competent jurisdiction for protection from its creditors generally or a petition is presented or a resolution is passed by it for its winding up, a court of competent jurisdiction makes an order for its winding-up or dissolution, an administration order is made in relation to it or a receiver or administrative receiver is appointed over or a person legally appointed to do so takes possession of or sells any of its assets or notice of a meeting to carry out any of the foregoing is duly served; or

Likewise, once you have served the minimum contract period you must provide us with 30 days written notice that you wish your contract to terminate.

If you are on a renewable contract and you are in a subsequent 12 month period, then you must provide us with 30 days written notice prior to the 12 month period ending.

17 Special Data Products Service Terms

17.1 Definitions :	
Committed Delivery Date (CDD)	Means the date by which we anticipate the activation date of the services to begin. This is also the date by which AdEPT Telecom is measured against service credits for failing to deliver on or before the CDD.
Data centre	Is a dedicated building providing space, power and secure facilities for storing data equipment and services. Often called a carrier hotel (where a telecommunications 'carrier' will rent space or 'rooms' within a data centre). AdEPT Telecom's network providers house their local points of presence (PoPs) in certain data centres around the UK.
Ethernet First Mile (EFM)	Is a term of reference given to the delivery of an Ethernet circuit, where the tail circuit is copper rather than the traditional fibre. New technology makes this possible and more affordable in locations where fibre delivery is either impossible or prohibitively expensive.
Ethernet circuit	Is similar to a leased line, but is generally a fibre based product to the point of entry into a building (except where the 'tail circuit' is provided as copper on an EFM technology). However, Ethernet circuits differ in that they are always presented as either an RJ45 connection (copper twisted pair Cat5e patch cable) or as a fibre patch cable presentation (termination type to be specified). Ethernet circuits operate at the International standard IEEE 802.3. Ethernet circuits are available usually at incremental speeds of 1Mb or 2Mb, where the minimum circuit speed is 1Mb, and the maximum will be multi gigabit circuits.
Leased line	A leased line is a symmetric telecommunications line connecting two locations. It is sometimes known as a 'private circuit' or 'data line'. Unlike a traditional PSTN line it does not have a telephone number,

faces not numbers

	<p>each side of the line being permanently connected to the other. Leased lines can be used for telephone, data or Internet services. In this instance, we refer to leased lines as either a point to point (P2P) connection between two customer locations, or between a customer location and a data centre, or between a customer location and a PoP. In the latter instance, this will be typically for Internet provision. In the U.K. leased lines are available at speeds from 64Kb/s increasing in 64Kb/s increments to 2Mb/s over a channelised E1 tail circuit, and can be purchased in higher bandwidths. However, AdEPT Telecom only provides 2Mb E1 circuits. These circuits can be provided over copper or fibre.</p>
<p>Point of Presence (PoP)</p>	<p>Is a node within the AdEPT Telecom network, sited within a data centre. It is the local point within our network, to where Internet circuits are terminated.</p>
<p>Target ready for service date (TRFS)</p>	<p>Means the initial date which is supplied by the AdEPT Telecom provisioning team as the estimation for an activation date. This is not a binding date, nor is it a CDD, and should be used as a guide only as to the likely activation date.</p>
<p>17.2 Order Process:</p>	
<p>17.2.1</p>	<p>AdEPT Telecom will endeavour to issue a TRFS at the same time at which it acknowledges receipt and confirm the customer order. The TRFS is the day on which we expect (under normal circumstances) the service activation date commences, and therefore the date which the service contract starts.</p>
<p>17.2.2</p>	<p>Throughout the provisioning process, AdEPT Telecom will need to communicate with named member(s) of the customer's staff (or their nominated representatives) to arrange access to the customer or the end user's premises, for AdEPT Telecom and/or their third party suppliers. Any delays to these requests either by the customer, their representatives, the end user, or the Landlord of the termination premises will delay AdEPT Telecom from meeting the TRFS and from issuing a CDD.</p>

faces not numbers

17.2.3	Typically within 10 working days of acceptance of an order, AdEPT Telecom or their third party representative will perform a termination location, premises survey, also known as a 'site survey'. It is typical that within a further 10 working days of the site survey, that AdEPT Telecom will be able to issue a CDD.
17.2.4	The CDD is the date by which AdEPT Telecom agree to have service ready for use (the activation date), and should AdEPT Telecom miss this target date, the customer is able to claim 'service delivery credits' which are detailed below in table 17.2.5 subject to 17.2.2, any delays outside of AdEPT Telecom control may lead to delays in the CDD and therefore invalidate any service delivery credit claim.
17.2.5	SERVICE DELIVERY CREDITS
Number of working days beyond AdEPT Telecom CDD date	Compensation = percentage of connection charge for the circuit to be credited to the customer
01-10	5%
11-15	10%
16-20	15%
More than 20	20%
17.2.6	<p>In the event that the customer takes a dual circuit solution from AdEPT Telecom, where the tail circuits are provided by alternate carriers (or the same carrier but via geographically diverse PoPs) and one is configured as primary, with the other as a backup, then AdEPT Telecom will provide a TRFS and a CDD for each circuit.</p> <p>The processes outlined within this document for delivery, will apply to each. Where the solution is quoted and sold at a fixed monthly, quarterly or annual price, AdEPT Telecom reserve the right to charge for separate services as they are delivered. E.g. customer takes 100Mb leased line, with a 10Mb leased line backup In this event, AdEPT Telecom will charge for the first circuit and accompanying hardware (such as, but not limited to, routers, firewalls</p>

faces not numbers

	<p>or cable trays) delivered on a pro rata basis, as this is a useable Internet connection.</p> <p>The final charges will be applied on delivery of the second circuit and its confirmed live backup status presented in a working condition. At this stage, the contract term of the agreement for the solution will start. E.g. customer taking a 36 month term contract, with a 100Mb primary and a 10Mb backup circuit. The 100Mb circuit is delivered (as working) 2 months before the backup circuit. Not until the delivery of the backup circuit will the 36 month term of the agreement start. This means that the customer will be liable to pay the installation, monthly rental and reasonable set up costs as described above, for the primary circuit for an additional 2 months in this example.</p> <p>In all cases, unless otherwise stated by the customer, AdEPT Telecom and their third party suppliers as applicable will endeavour to provide both or any circuits as part of any given solution at the same time. However, when this is not practicable or any third part service provider will not accommodate such requests, then the customer will be liable for all service charges as they arise on the activation date of said services.</p>
17.2.7	<p>In the event that a customer takes an ADSL backup service to their leased line, AdEPT Telecom will deliver the ADSL service and the leased line as close to the leased line CDD as possible using all reasonable endeavours. The exception to this will be when a customer asks for the ADSL service to be supplied in lieu of the leased Line being fulfilled. In this instance, AdEPT Telecom will charge pro rata for the delivery and rental of the ADSL service and accompanying hardware (such as, but not limited to, routers, firewalls or cable trays). The final charges will be applied on the activation date of the primary leased line circuit.</p>
17.2.8	<p>For ADSL backup services, at no time will the provision of an ADSL service be subject to service delivery credits.</p>
17.2.9	<p>Where ADSL backup services are taken, it is the customer's responsibility to ensure that there is an adequate, uncompromised BT analogue PSTN circuit. Should the customer not provide a valid telephone number for this PSTN circuit, then AdEPT Telecom will not be able to provide the ADSL service. Similarly, if the PSTN termination is not in the correct location (should be within 3 metres of the planned</p>

17.2.10	<p>For all services, when an installation fee is levied (as per the customer order form) AdEPT Telecom reserve the right to invoice this fee, which must be paid before we hand over the service to the customer or end user.</p>
17.2.11	<p>Subject to 17.2.6 and 17.2.7, the term of the service contract as indicated on the customer order form will not start until the final circuit or complete solution is delivered. I.e. the service charges and start dates of individual circuits may be staggered, but the service solution term of contract will start and end at the same time. This means that the first circuit to be provisioned will be invoiced prior to the term of the contract starting, and the invoice period in lieu of the backup or secondary circuit(s) will vary depending on the independent tail circuit CDDs. Wherever possible however, we will try to ensure that the CDD for each circuit in a multi circuit solution are as close together as possible.</p>

18 Special Telephone Systems Maintenance Terms

AdEPT has agreed to provide and the Customer has agreed to engage AdEPT to provide the maintenance services in respect of the Equipment as described in the Order Form.. AdEPT will only supply telephone systems maintenance to customers who also take calls and lines from AdEPT. Cancellation of a calls and lines contract will automatically invalidate a telephone systems maintenance contract and no monies will be refunded. AdEPT will subcontract telephone systems maintenance to Maintel.

18.1 Uneconomic to maintain

If in AdEPT's opinion (acting reasonably) it becomes uneconomic to maintain the Customer's telephone system, AdEPT reserves the right to give the Customer 90 days termination notice at any time.

18.2 Maintenance and repair

- (a) During the period of the Agreement, in consideration of the payment of the Annual Maintenance Charge, AdEPT shall as soon as is reasonably practicable after notification by the Customer provide the services of a maintenance engineer to carry out any maintenance of and repairs and replacements to the Equipment that may be reasonably requested by the Customer and shall carry out free of any extra charge any maintenance, repairs and replacements (including the provision of any necessary materials and spare parts) as shall be necessary as a result of fair wear and tear arising from the proper operation of the Equipment.

Replacement parts will become the property of the Customer, and replaced parts the property of AdEPT. Replacement parts will be of at least equivalent functionality but may not be identical model or colour. Any maintenance, repairs or replacements or Customer visits caused other than by fair wear and tear may be carried out at the Customer's expense at AdEPT's current rates. The response time for these faults will be guided by the service level shown on the Order Form.

All maintenance, repairs or replacements may be carried out at the premises where the Equipment is installed or elsewhere at the option of AdEPT. For the avoidance of doubt AdEPT's response may be fulfilled either by accessing the system remotely with a view to diagnosing the fault or by having an engineer attend site with a view to diagnosing the fault.

(e) Where the Customer requests that the remedial work carried out by AdEPT is done outside of the contracted hours then AdEPT may charge at its current rates for this.

(f) Where a fault has been logged and AdEPT has responded and no fault exists on the Equipment then this is deemed to be an "Abortive Visit". Abortive Visits will be charged to the Customer at £225. Where a fault has been logged and AdEPT is unable to gain access

to the Customer's premises during the hours contracted then AdEPT may charge the Customer an Abortive Visit call out fee.

- (g) Where parts are delivered to the Customer and the Customer is due to return an equivalent part to AdEPT, AdEPT will invoice the Customer the normal selling price of the part in the event that the part is not returned to AdEPT within two weeks of receipt by the Customer of the replacement part. AdEPT will also invoice the Customer for the cost of repairing any damage to the part which reasonably appears to have been caused by the inadequate packaging by the Customer.
- (h) Where parts are delivered to the Customer by courier and/or electronic worksheets are used, the Customer agrees that electronic signatures applied in acknowledgement of parts delivered or services rendered will have the same legal force as hard copy signatures.
- (i) It is understood that AdEPT cannot make appointments to carry out remedial work to faults. AdEPT operates an allocation and scheduling system that prioritises faults according to severity of the fault and the level of cover provided. AdEPT will endeavor to attend the fault at the earliest opportunity within the cover period. Any estimates relating to the time that engineers will either attend site or respond remotely are only best indications and must not be taken as firm appointment times. AdEPT cannot be held responsible for responding to faults at a different time to that estimated.
- (j) For the purpose of Clause 18.2(d) any reference to public and bank holidays shall refer to the public and bank holidays that exist in the country where the site is located.
- (k) AdEPT is not responsible for providing software upgrades, enhancements or patches free of charge.
- (l) For health and safety reasons, AdEPT reserves the right to decline to attend the Customer's site if AdEPT's engineer will be alone on site or in an isolated area of the site.

18.3 Alterations to equipment and extension wiring

- (a) All alterations to apparatus and extensions to wiring (including removal and reinstallation to a new site) shall be carried out by an installer authorised by AdEPT. AdEPT reserves the right to carry out a Maintenance Acceptance Test ("MAT") on this new equipment. AdEPT may charge at its current rates for this MAT.
- (b) Any alterations to Equipment and wiring shall be notified to AdEPT within 14 working days of the commencement of the works.
- (c) AdEPT may adjust the Annual Maintenance Charge if the Equipment is altered, in accordance with its current level of charges. In this event, the Customer shall sign a

supplementary contract, detailing the additional equipment and the additional maintenance charge.

- (d) Where insufficient notice is given then AdEPT may ask for proof of the date of installation relating to any additional equipment and AdEPT may retrospectively charge for the maintenance of this equipment in line with its current rates.
- (e) For the avoidance of doubt if the Customer adds new parts to the Equipment detailed on the Order Form then this will be automatically maintained by AdEPT, at AdEPT's discretion. AdEPT will as a consequence invoice the Customer for the maintenance of these new parts.

18.4 Inspection of installation

AdEPT may request to carry out an MAT prior to responding to the first fault that is logged. AdEPT may carry out the MAT as a separate visit. If the MAT is passed then faults may be logged with AdEPT and service will commence. If the MAT is failed then AdEPT reserves the right to request that any specific remedial action be carried out (at the Customer's cost) prior to attending to any fault. Where the MAT is failed but where any necessary remedial action can be carried out by AdEPT then AdEPT may carry this out and charge this to the Customer at its current rates.

18.5 Carrier's liability

Where the fault that has been logged has been a non-system fault, but instead one of the carrier (i.e. British Telecom or Cable & Wireless etc) then AdEPT will charge the Customer for the call out and any parts used at its current rates. AdEPT will provide a carrier fault reference that can be used to recharge the cost that AdEPT has charged, on to the carrier. AdEPT cannot accept responsibility where the carrier refuses to cover all these costs.

18.6 The Customer's responsibilities and liabilities

- (a) The Customer shall notify AdEPT either orally or in writing as soon as possible of any fault in the Equipment or of any work or maintenance that may be necessary. AdEPT may at its option repair at its current rates faults or damage that have arisen because of the failure of the Customer to notify AdEPT properly.
- (b) The Customer shall not allow the Equipment to be moved, interfered with or tampered with and shall at all times comply with all reasonable advice given by AdEPT in relation to the operation and care of the Equipment. AdEPT may at its option repair at its current rates faults or damage that have been caused by such moving, interference or tampering or by any failure by the Customer to comply with AdEPT's directions.
- (c) Should any maintenance, repair, replacement, alteration or addition be made to the Equipment other than by AdEPT or its authorised installer, AdEPT may terminate the

- Agreement with immediate effect by giving the Customer written notice and may retain the Annual Maintenance Charge.
- (d) The Customer shall at its expense comply with all statutory requirements, bylaws, obligations, regulations, recommendations or instructions relating to the use or testing of the Equipment. The Customer shall obtain and pay for any licences, way leaves, suitable private wires, jack sockets or any other items necessary for the operation of the Equipment. Suitable electric supplies where needed shall be provided and maintained by the Customer at its expense.
 - (e) The Customer shall give AdEPT and its representatives unhindered access to the Equipment and shall at its expense make available mains electric supply and any other facilities, services and co-operation as may be necessary for the proper and prompt maintenance or repair of the Equipment under this Agreement.
 - (f) The Customer shall ensure site plans are accessible to AdEPT on each visit. The Customer shall ensure that all programming performed by a third party is backed up and made available to AdEPT. It is advised that both the site plans and programming diskette are located next to the system.
 - (g) Where the system allows remote access via a modem, it is the Customer's responsibility to provide a suitable modem in order for AdEPT to respond adequately to any fault. Where access is deliberately denied via a modem then AdEPT may increase the Annual Maintenance Charge by up to a further 50%.
 - (h) The Customer shall maintain an environment suitable to support efficient operation of the Equipment. The Customer is responsible for any damage caused by electrical surges, flooding, lightning, over heating or other external influences, which do not constitute fair wear and tear. AdEPT will charge the Customer for parts and labour in respect of such damage at its current rates. In the event of disagreement as to whether work is chargeable or not, AdEPT may provide reasonable but not necessarily absolute evidence of such external influences, however the Customer's signature on a relevant chargeable job sheet will in any event signify its acceptance that the work is chargeable.
 - (i) Prior to commencement of work by AdEPT at the Customer's Premises, the Customer shall inform AdEPT's employees attending the Premises of all relevant health and safety regulations relating to the Premises and any issues relating to dangerous substances, asbestos and similar risks, and the Customer shall comply with all relevant legal requirements including its employer's duties under health & safety legislation.
 - (j) Where the Customer's internal control procedures require a purchase order to be raised for chargeable work undertaken by AdEPT, it is the Customer's responsibility to ensure that this occurs: AdEPT can accept no delay in payment due to the absence of such purchase order

- (k) If the Customer fails to observe the provisions of this Agreement, AdEPT may decline to respond to a fault and/or may terminate the Agreement with immediate effect by giving the Customer written notice and may retain the Annual Maintenance Charge.
- (l) AdEPT shall not be liable for any costs, or consequential losses or consequential costs relating to telephone calls or any malicious acts resulting from these telephone calls made in a malicious or otherwise manner, made through the telephone system either from within the Customer's premises or by a third party obtaining access to the Customer's system. For the avoidance of doubt, the security of the Customer's telephone system is the sole responsibility of the Customer notwithstanding any work carried out on the system by AdEPT employees or subcontractors.
- (m) AdEPT shall not be liable for any costs, or consequential losses or consequential costs resulting from the Customer's inability to perform pre-programmed tasks (for example analysis of call logging records) following work carried out by AdEPT. Whilst AdEPT will endeavour to minimise disruption to the Customer, the Customer acknowledges that it is solely responsible for such programming and re-programming, and checking that programmes have not been affected by any work carried out on the Equipment.

18.7 Liability and indemnity

- (a) AdEPT will indemnify the Customer:
 - i. against liability for personal injury or death directly attributable to the negligence of AdEPT in the performance of this Agreement; and
 - ii. against physical damage (but not loss of any data or other consequential loss) caused to the Customer's tangible property directly arising from the negligence of AdEPT in connection with AdEPT's maintenance of the Equipment. The Customer agrees to afford AdEPT not less than 30 days in which to remedy any default under this Clause 18.7(a) (ii).
- (b) AdEPT's total liability, other than that referred to in Clause 7(a) (i), to the Customer under the indemnities contained in this Clause 7 shall not exceed the Annual Maintenance Charge for one or more related claims arising in any one twelve month period.
- (c) Except for Clause 18.7(a) (i) and (ii) and subject to the provisions of this Clause 18.7 AdEPT shall not be liable to the Customer for any loss, expense or damage of any kind (direct, indirect or consequential and whether arising from negligence of otherwise) in connection with AdEPT's maintenance of the Equipment or otherwise.
- (d) The Customer acknowledges that the Annual Maintenance Charge reflects the limitations contained in this Clause 18.7. It is the Customer's responsibility to effect insurance cover

in respect of all risks relating to the services of AdEPT which are not covered by this Agreement or the liabilities accepted under this Clause 18.7.

- (e) AdEPT does not accept any responsibility for system faults caused by telephone area code changes, changes in carrier services or as a result of any legislative changes.
- (f) AdEPT accepts no liability for any claim relating to least cost routing programming.
