

## Overview

- Go Green, is a leading waste management and recycling company operating across the UK. Since their beginning in 2000, the company has expanded rapidly due to its extensive knowledge and expertise across the industry, alongside an extensive supplier network. With the ability to offer additional legal advice and services, Go Green have enhanced their reputation as a leader in the sector, delivering logistical efficiency and exceptional customer service to their clients.

## Situation

As a growing business, Go Green's reliance on IT and systems increased. The accounting software they were using was outdated and simply not up to the tasks the organisation was asking of it.

enabled us to integrate all areas of the business, and it was vital we adopted a system that would withstand our future vision of growth for the company. We subsequently started looking into upgrading our software and

**The AdEPT team is now providing full network support and data backups; continuously looking for ways to make the Go Green processes and procedures as smooth and innovative as possible.**

Go Green required a modernised solution to their account's software. Roger Wells, the Operations and Compliance Director at Go Green, explained how their Sage50 system was ready to fail as it had reached full capacity.

"As a very IT orientated business, we required a solution that

Sage200 fitted the bill perfectly". After initial discussions between Go Green and ACS, it was clear to see that innovation was a key requirement. The company was always looking for ways to save on double handling and to save time spent on menial tasks to ensure expertise of the team was fully utilised on more challenging projects.

**"AdEPT is located just on our doorstep and is the only Sage200 supplier in Doncaster"**

**“The level of expertise the AdEPT team offers is brilliant. The team were amazing throughout the entire integration process, on hand if we had any questions or issues. We look forward to working with the team going forward, they don’t use jargon – are flexible, approachable, helpful and straight talking.”**

## The solution

AdEPT Sage consultants visited Go Green and discussed the vision for the company with the senior management team, alongside assessing the existing systems and processes.

Sage200 was agreed and AdEPT was appointed to take on the challenging installation project. Detailed planning was crucial to ensure limited downtime and disruption to the company whilst the system integration took place. This ensured that the Go Green team could continue to work with clients nationwide with no disruption to service.

The entire integration was seamless, efficient and was delivered to budget and timeframe.

Alongside the upgrade and integration of all company systems, the Go Green team was given full training to enable a smooth transition from Sage50 to 200. The system was recognisable for staff, so it was a lot less daunting for the team to adopt.

Having the Sage200 system will support Go Green as a company to achieve its three-year goal of 20% year on year growth and becoming a major player in the district.
